Funding Excellence: Driving Impact

Today, over 60% of Canadians diagnosed with cancer will survive compared to about 25% in the 1940s when the Society began funding research.

WORLD CLASS RESEARCH

Strong peer review leads to funding excellent research that will have the most impact in the fight against cancer.

Society-funded researchers are making a bigger scientific impact than other researchers in Canada.

Canadian researchers apply for funding

Scientists and community representatives review applications

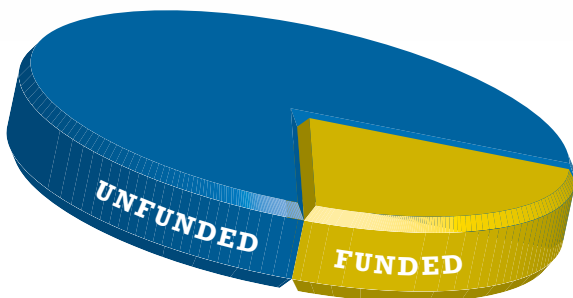

Applications are scored based on excellence and impact

Not recommended for funding

Recommended for funding

Top-ranked grants are funded

On average, we fund less than 25% of recommended research grants due to lack of funds.

Progress has been made, but more needs to be done. Help fight cancer by making a donation to the Canadian Cancer Society.
